

**UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION**  
Washington, D.C. 20549

**FORM 8-K**

**CURRENT REPORT**  
Pursuant to Section 13 or 15(d) of  
The Securities Exchange Act of 1934

**Date of Report (Date of earliest event reported): June 5, 2019**

**Aclaris Therapeutics, Inc.**

(Exact name of registrant as specified in its charter)

**Delaware**  
(State or other jurisdiction of incorporation)

**001-37581**  
(Commission File Number)

**46-0571712**  
(IRS Employer  
Identification No.)

**640 Lee Road, Suite 200**  
**Wayne, PA 19087**  
(Address of principal executive offices, including zip code)

**(484) 324-7933**  
(Registrant's telephone number, including area code)

**N/A**  
(Former name or former address, if changed since last report)

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions:

- Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)
- Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)
- Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))
- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock, \$0.00001 par value	ACRS	The Nasdaq Stock Market, LLC

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933 (§230.405 of this chapter) or Rule 12b-2 of the Securities Exchange Act of 1934 (§240.12b-2 of this chapter).

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

**Item 7.01 Regulation FD Disclosure.**

On June 5, 2019, management of Aclaris Therapeutics, Inc. (the “*Company*”) will present a company overview at the Jefferies 2019 Global Healthcare Conference at 3:30 PM ET at the Grand Hyatt Hotel in New York, New York. The presentation will include a slide presentation. A copy of this slide presentation is furnished as Exhibit 99.1 to this Current Report on Form 8-K.

In accordance with General Instruction B.2. of Form 8-K, the information in this Item 7.01 and Exhibit 99.1 hereto, shall not be deemed “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the “*Exchange Act*”), or otherwise subject to the liability of that section, nor shall it be deemed incorporated by reference in any of the Company’s filings under the Securities Act of 1933, as amended, or the Exchange Act, whether made before or after the date hereof, regardless of any incorporation language in such a filing, except as expressly set forth by specific reference in such a filing.

## Cautionary Note Regarding Forward-Looking Statements

Any statements contained in this presentation that do not describe historical facts may constitute forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. These statements may be identified by words such as "believe", "expect", "may", "plan," "potential," "will," and similar expressions, and are based on Aclaris' current beliefs and expectations. These forward-looking statements include expectations regarding Aclaris' development of its drug candidates, including the timing for initiation and completion of clinical trials, the availability of data from these trials and the timing of its regulatory submissions related to these trials, and the growth opportunity for ESKATA and RHOFADÉ. These statements involve risks and uncertainties that could cause actual results to differ materially from those reflected in such statements. Risks and uncertainties that may cause actual results to differ materially include uncertainties inherent in the conduct of clinical trials, Aclaris' reliance on third parties over which it may not always have full control, and other risks and uncertainties that are described in the Risk Factors section of Aclaris' Annual Report on Form 10-K for the year ended December 31, 2018, and other filings Aclaris makes with the U.S. Securities and Exchange Commission from time to time. These documents are available under the "SEC filings" section of the Investors page of Aclaris' website at <http://www.aclaristx.com>. Any forward-looking statements speak only as of the date of this presentation and are based on information available to Aclaris as of the date of this presentation, and Aclaris assumes no obligation to, and does not intend to, update any forward-looking statements, whether as a result of new information, future events or otherwise

This presentation also contains estimates and other statistical data made by independent parties and by us relating to market size and other data about our industry. This data involves a number of assumptions and limitations, and you are cautioned not to give undue weight to such estimates. In addition, projections, assumptions and estimates of our future performance and the future performance of the markets in which we operate are necessarily subject to a high degree of uncertainty and risk.

# Conditions with Significant Treatment Gaps

## SEBORRHEIC KERATOSIS (SK)

83+MM people in U.S.\*1

ESKATA® (hydrogen peroxide) topical solution, 40% (w/w), first FDA-approved topical treatment for raised SKs in adults

## ALOPECIA AREATA (AA)

5-7MM people in U.S.

have or will develop AA<sup>2,7</sup>  
Currently available Rx treatment options often used off-label and have significant limitations<sup>7</sup>

## VERRUCA VULGARIS (COMMON WARTS)

19-22MM people in U.S.<sup>2,3</sup>

Currently available treatments have modest therapeutic effect and significant limitations<sup>4</sup>

## ANDROGENETIC ALOPECIA (MALE / FEMALE PATTERN HAIR LOSS)

~50MM men / ~30MM women

in U.S. affected by AGA hair loss<sup>8</sup>

## VITILIGO

1-2% of global population impacted<sup>5</sup>

No FDA-approved medication to repigment the skin<sup>5</sup>

## ROSACEA

16+MM people in U.S.<sup>9</sup>

RHOFADE® (oxymetazoline hydrochloride) cream, 1% FDA-approved for the topical treatment of persistent facial erythema (redness) associated with rosacea in adults, a symptom experienced in about 71% of patients with rosacea<sup>9</sup>

\*Includes all types of SKs <sup>1</sup>Bickers et al. IMPORTANT SAFETY INFORMATION • PRODUCT INFORMATION • FOR HEALTHCARE PROFESSIONALS

Savings & Offers Find a Dermatologist Menu

- National Rosacea Society estimates more than 16 million Americans are affected by rosacea<sup>1</sup>
- Persistent facial erythema (PFE) is the most common sign or symptom of rosacea, experienced in about 71% of rosacea patients according to a survey conducted by this same Society<sup>1</sup>
- RHOFADE Growth Opportunity:
  - Increase prescribing by current RHOFADE prescribers
  - Recapture lost share from HCPs who decreased their prescribing in 2018
  - Capitalize on untapped potential within rosacea-treating HCPs who are not yet prescribing a medication to treat PFE

**INDICATION**  
RHOFADE cream is indicated for the topical treatment of persistent facial erythema associated with rosacea in adults.

**IMPORTANT SAFETY INFORMATION AND WARNINGS**

**WARNINGS AND PRECAUTIONS**

**Potential Impacts on Cardiovascular Disease**

Alpha-adrenergic agonists may impact blood pressure. RHOFADE cream should be used with caution in patients with severe or unstable or uncontrolled cardiovascular disease, orthostatic hypotension, and uncontrolled hypertension or hypotension. Advise patients with cardiovascular disease, orthostatic hypotension, and/or uncontrolled hypertension/hypotension to seek immediate medical care if their condition worsens.

The most common side effects of RHOFADE® Cream include application-site reactions of: skin reactions (dermatitis), worsening of rosacea (pimples, itching, redness, and pain).

<sup>1</sup>National Rosacea Society, <https://www.rosacea.org/rosacea-review/2010/summer/new-survey-uncovers-wide-range-of-potential-signs-and-symptoms>, Last accessed on March 30, 2019.

# Core Intellectual Property: RHOFADÉ

- **Three-year CI market exclusivity until January 18, 2020**
- **Five Orange Book Patents**
  - **USP No. 7,812,049 (Exp 5/2/28 with 1562 days PTA)**
    - Method of treating erythema resulting from rosacea comprising administering topically a composition comprising about 0.05-30% of oxymetazoline as the sole active agent
    - Exclusively licensed from Allergan
  - **USP No. 8,420,688 (Exp 8/02/24 with 193 days PTA)**
    - Same as '049, but recites "therapeutically effective amount" of oxymetazoline
    - Exclusively licensed from Allergan
  - **USP No. 8,815,929 (Expires: 1/22/24)**
    - Same as '688, but recites oxymetazoline and other alpha-1 agonists
    - Exclusively licensed from Allergan
  - **USP No. 8,883,838 (Exp 12/1/31)**
    - A cream composition with certain % of oxymetazoline, % of certain emollient/emulsifier/excip/ etc. (the stabilized cream)
  - **USP No. 9,974,773 (Exp 6/11/35)**
    - Method of treating facial erythema associated with rosacea comprising topically administering once daily to the site of erythema on the face of the patient a pharmaceutical composition comprising 1.0% or 1.5% w/w oxymetazoline HCl thereof as the sole active ingredient
- **Pending applications**
  - Families related to Orange Book listed patents have pending applications in the U.S.
  - Pending applications are directed to, for example, methods of treating facial erythema using 1.0% oxymetazoline administered once daily; cream formulations of oxymetazoline; method of treating erythema, telangiectasia or inflammatory lesions associated with rosacea comprising topically administering formulations of oxymetazoline
  - Corresponding pending/issued applications in major international jurisdictions

**83+MM** People in the US with SK<sup>1</sup>

**18+MM** visits to Derm for SK<sup>2</sup>

**8+MM** SK treatments<sup>2</sup>

### Reasons for Not Removing SKs Include<sup>3</sup>:

- High risk of **scarring**
- High risk of **hypopigmentation**
- Want to avoid **cutting, freezing or burning**
- Moved to second position in the detail schedule
- Sales team focused on top ESKATA accounts based on productivity in each territory, with the objective of increasing utilization
- Received recent European approvals for ESKATA / ESKERIELE and in active discussions with potential commercial partners

\*Includes all types of SKs <sup>1</sup>Bickers et al. The Burden of Skin Disease. *J Am Acad Dermatology*. 2006;55:490-500. <sup>2</sup>Data on File. Aclaris Therapeutics, Inc. Burke Screener of 594 dermatologists. 2014. <sup>3</sup>Data on File. Aclaris Therapeutics, Inc. In-Office SK Treatment Study. Final Report. 2016.

# Common Warts: Treatment Paradigm

### Peds/PCPs:

- Difficult and recalcitrant cases are typically referred to dermatologists
- Less likely to utilize in-office procedures but more likely to utilize take-home Rx/OTC

### Dermatologists:

- Viewed as the specialists in the treatment of warts; other specialties follow dermatologists' lead
- More likely to utilize both in-office procedures and take-home Rx/OTC

- Patient burden comes from the duration of treatment, time commitment, pain and discomfort, as well as the cost of treatments
- Opportunity to position A-101 45% as Rx treatment with convenience of home use

# Summary of WART-203 Phase 2 Trial Results

Trial	Trial Design	Trial Outcome
<b>WART-203 (N=159)</b>	<ul style="list-style-type: none"><li>• A randomized, double-blind, vehicle-controlled, parallel-group study of investigational drug A-101 45% topical solution in subjects with 1-6 common warts</li><li>• Self-treated twice weekly for a total of 16 treatments</li></ul>	<ul style="list-style-type: none"><li>• Efficacy: Statistically significant results on all primary and secondary endpoints</li><li>• Favorable safety profile</li></ul>

### Primary Endpoint:

- Mean change from baseline in the Physician's Wart Assessment (PWA)<sup>TM</sup> score on target wart at day 56 (visit 10) using an analysis of covariance.

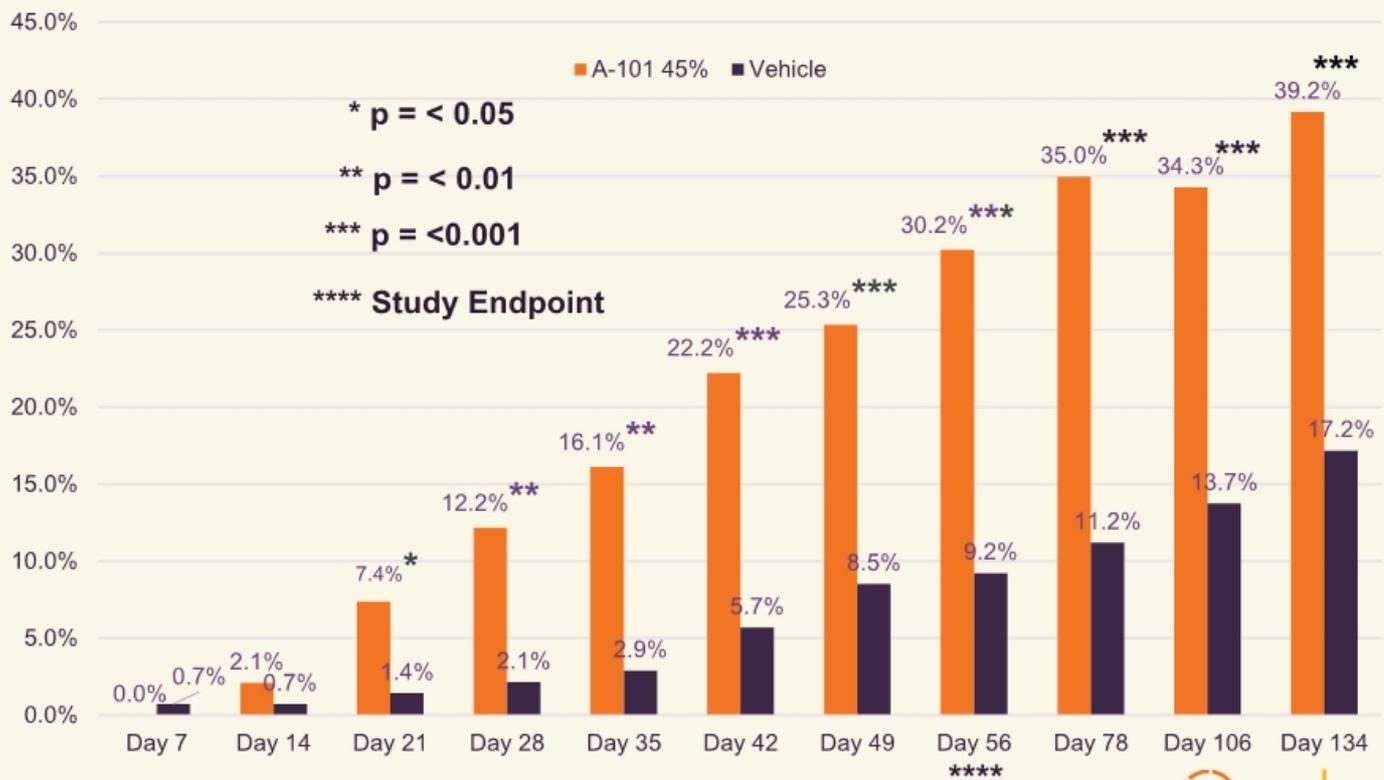

### Secondary Endpoints:

- The proportion of subjects whose target wart is judged to be clear (PWA=0) at day 56.
- The proportion of subjects with all treated wart(s) clear, stratified by baseline number of warts at day 56.
- The percentage of all treated warts that were clear at day 56.

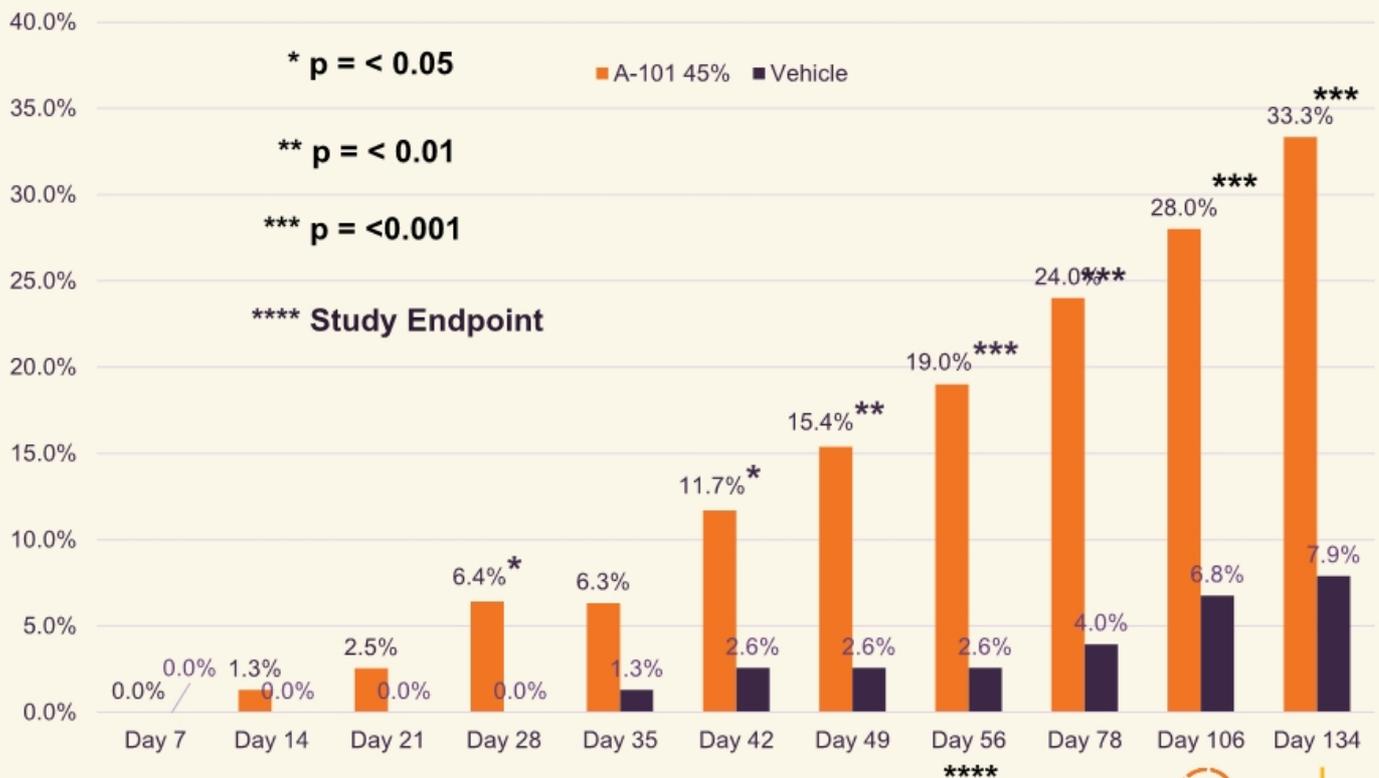

### Current Status

- Phase 3 Data expected 2H19.

# WART-203: The Percentage of All Treated Warts that are Clear on the PWA for Each Post-baseline Visit (N=159)

# WART-203: Proportion of Subjects with all treated Wart(s) (1-6) Clear, Stratified by Baseline Number of Warts, at each Post-Baseline Visit (N=159)

## Spectrum of Hair Loss

24%

34%

43%

51%

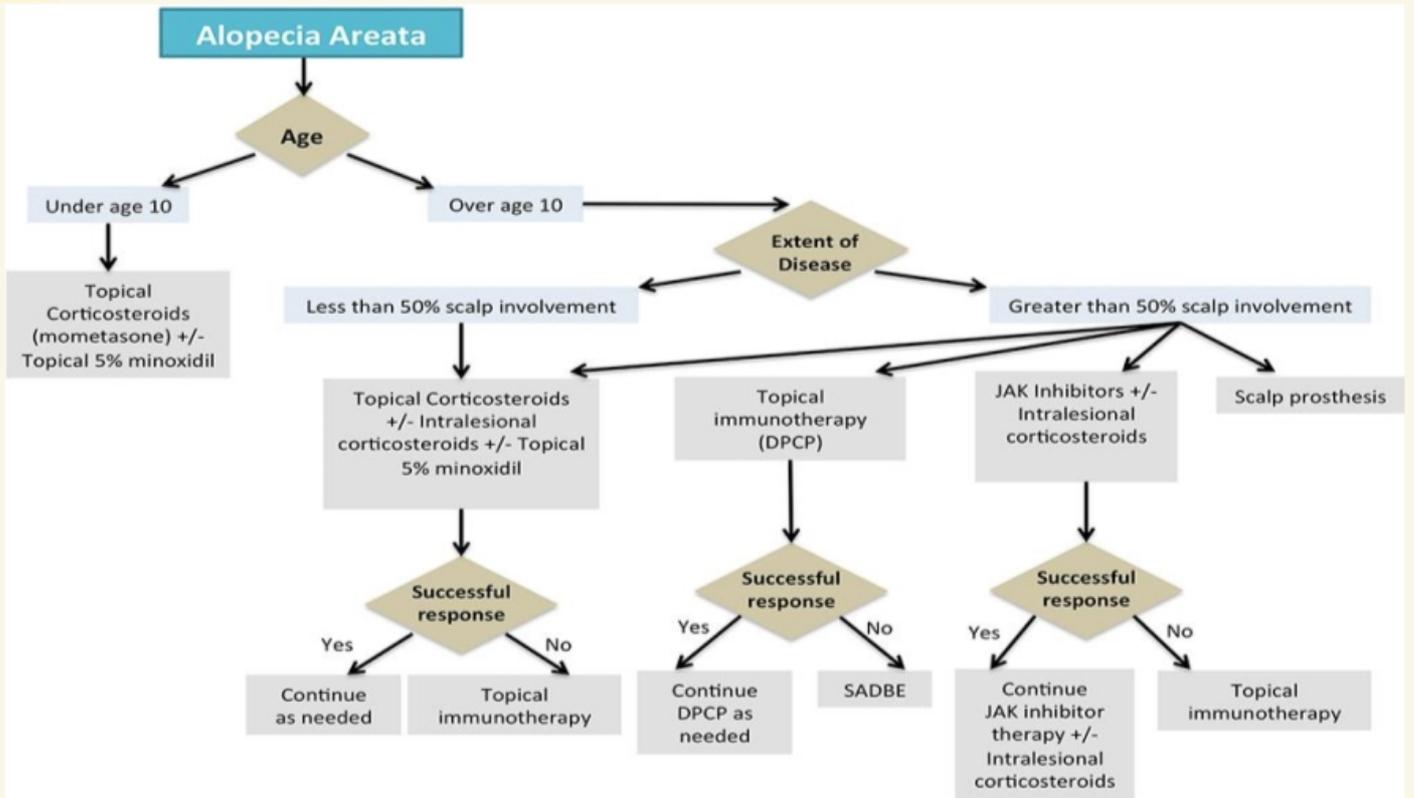

100%

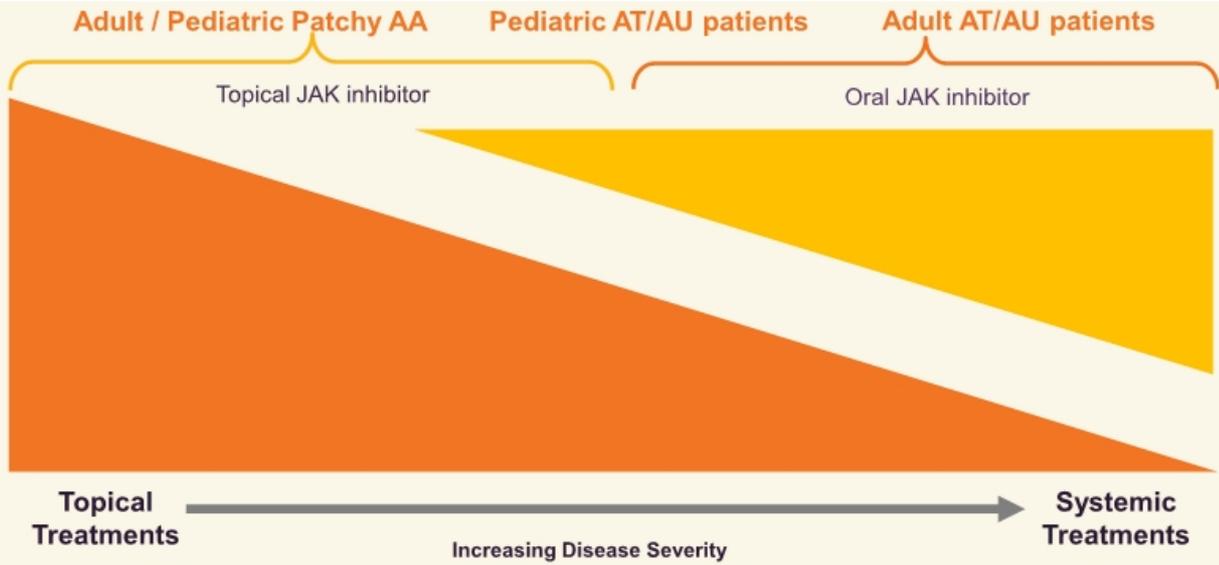

- 25-52% of patients have persistent patchy AA<sup>1</sup>
- 14-25% of patients progress to alopecia totalis or universalis<sup>1</sup>

# Current treatment paradigm

# Alopecia Areata: Potential Treatment Paradigms

## INDUCTION:

Topical JAK inhibitor may be efficacious in patients with less severe patchy AA  
 Oral JAK inhibitor may be best option in patients with more severe AT/AU phenotypes

## MAINTENANCE:

AT/AU patients may be able to maintain hair with topical JAK inhibitor  
 Concomitant topical therapy may decrease reliance on longer term oral therapy in some patients

# Androgenetic Alopecia (AGA)

# Androgenetic Alopecia (AGA): Male/Female pattern hair loss

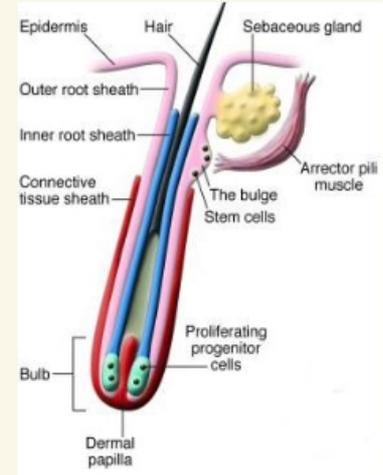

- AGA is a genetic disorder and the most common cause of hair loss<sup>1</sup>
- Experienced by 70% of men and 40% of women at some point in their lives<sup>1</sup>; affects ~50 million men and ~30 million women in the US<sup>2</sup>
- Affected individuals highly motivated to seek treatment<sup>1</sup>
- Potential benefits of topical JAK inhibitor in AGA:
  - ✓ New mechanism of action
  - ✓ Minimal systemic side effects
  - ✓ Non-hormonal
  - ✓ Novel option women with AGA

Male with AGA

Female with AGA

## AGA – New Mechanism of Action Postulated

**Figure 1. Role of TREM2+ Macrophages in Skin**

Dermal TREM2+ macrophages, now termed "Trichophages," reside in close proximity to hair follicles. During telogen—the hair cycle phase when hair is not growing—trichophages produce the cytokine OSM that binds to OSM receptors on hair follicle stem cells (HFSCs). This triggers phosphorylation of STAT5 within HFSCs, impairing their activation, and therefore resulting in maintenance of telogen.

- Tissue-resident immune cells with potent sensing and effector functions are well-placed to fundamentally aid tissue homeostasis via crosstalk with stem cells.
- A dermis-resident TREM2+ macrophage subpopulation that promotes hair follicle stem cell quiescence via cytokine-mediated JAK-STAT signaling has been identified.
- pSTAT5 (the p indicates that STAT5 is in the ON position – ie: active, and then a red curved arrow blocks HFSC activation (this is telogen))
- The administration of a JAK inhibitor would turn the pSTAT5 to the OFF position, and then opens the red arrow and PROMOTES HFSC activation.

## Core Intellectual Property: JAK inhibitor

- US & Global JAK IP estate consisting of >150 patents/applications (issued and/or pending)
- Exclusive license with Rigel Pharmaceuticals for ATI-501 & ATI-502 (COM) in dermatology
  - US Natural expiry dates 2030-2034 + potential applicable PTE for the treatment of AA
  - Corresponding patents & applications in 18 additional jurisdictions (EU, AU, CA, IN, JP, others) - Natural expiry dates 2030 + potential applicable PTE
- Exclusive license under Columbia University
  - Covers the use of certain JAK inhibitors for the treatment of AA, AGA, and other hair loss disorders and biomarkers to identify potential responders
  - This portfolio includes 6 issued U.S. patents and 1 pending application directed to methods of treating AA, AGA or hair loss disorders by administering ruxolitinib, deuterated ruxolitinib, baricitinib, decernotinib, topical tofacitinib or monotherapy tofacitinib.
  - This portfolio also includes an issued patent in Europe for tofacitinib or decernotinib for use in treating hair loss disorders and a pending European application for ruxolitinib or baricitinib to treat hair loss disorders, 3 issued patents in Japan to ruxolitinib, baricitinib, tofacitinib (topically or as monotherapy) and a pending Japanese application, and 1 issued patent in South Korea to methods of treating hair loss disorders using JAK 1 and/or JAK 2 inhibitors and 2 pending applications in South Korea to methods of treating hair loss disorders using JAK3 inhibitors.
  - Natural expiry in US 2031; naturally expiry in EU, JP, KR 2031-2033

# ATI-450 (MK2 Inhibitor)

(Investigational Drug Candidate)

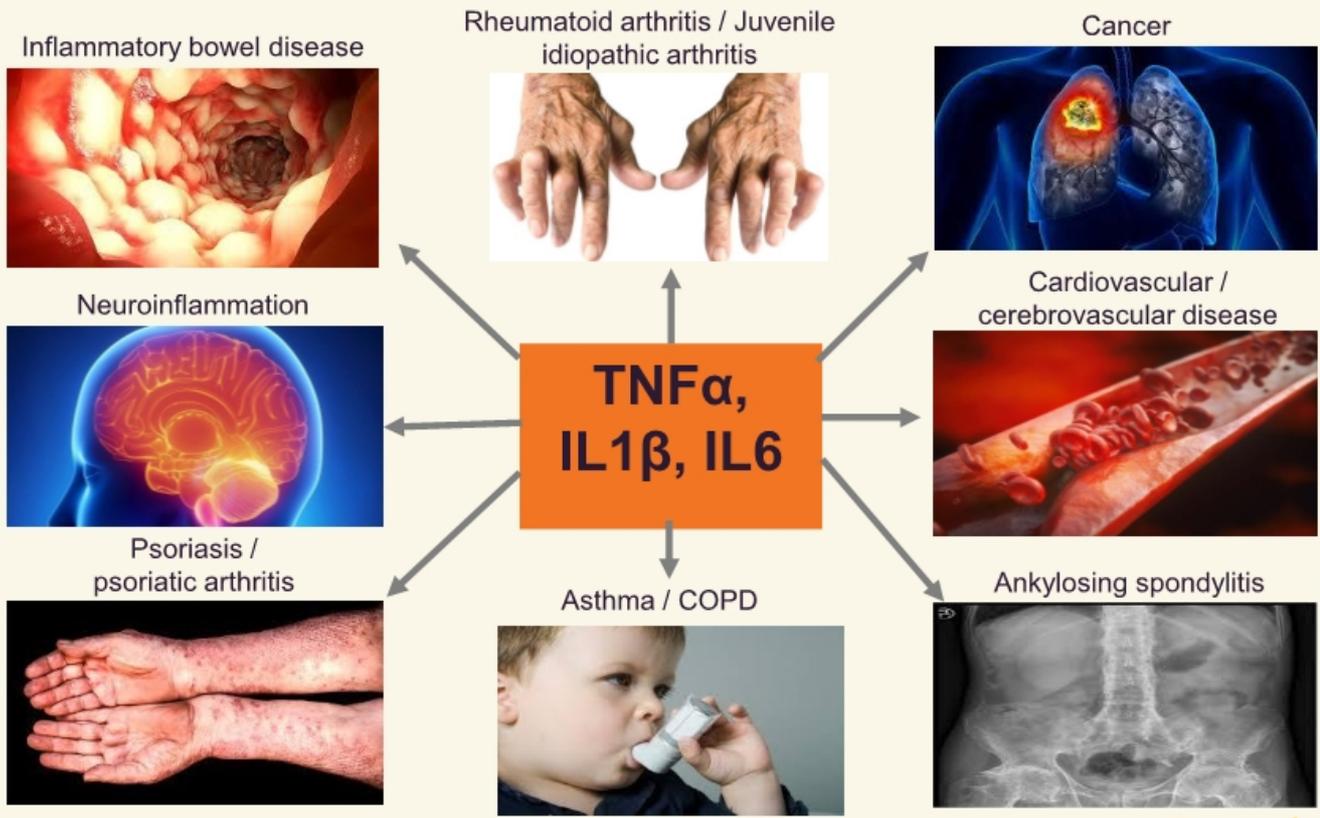

## MK2 Pathway Inhibitor (MK2 PI) ATI-450

- IND for treatment of RA allowed in May 2019
- Plan to initiate a Single Ascending Dose / Multiple Ascending Dose Phase 1 trial in approximately 80 patients in the second half of 2019
- If the Phase 1 trial is successful, plan to advance ATI-450 into Phase 2 trials in patients with RA and an additional inflammatory indication
- Pharmacologically unique MOA
- MK2 pathway inhibitors target the production and activity of key inflammatory cytokines including TNF $\alpha$ , IL-1 $\alpha$ , IL-1 $\beta$  and IL-6
- ATI-450 inhibits the cytokine targets of established biologics:
  - Anti-TNFs: Humira<sup>®</sup>, Enbrel<sup>®</sup>, Remicade<sup>®</sup>
    - RA, psoriasis, psoriatic arthritis, IBD, ankylosing spondylitis
  - Anti-IL1s: Kineret<sup>®</sup>, Ilaris<sup>®</sup>, Arcalyst<sup>®</sup>
    - CAPS, Still's disease, SJIA, cardiovascular disease
  - Anti-IL6: Kevzara<sup>®</sup>, Actemra<sup>®</sup>
    - RA, Castleman's disease
- Aclaris is developing MK2 pathway inhibitors for chronic inflammatory disease and autoimmune disease

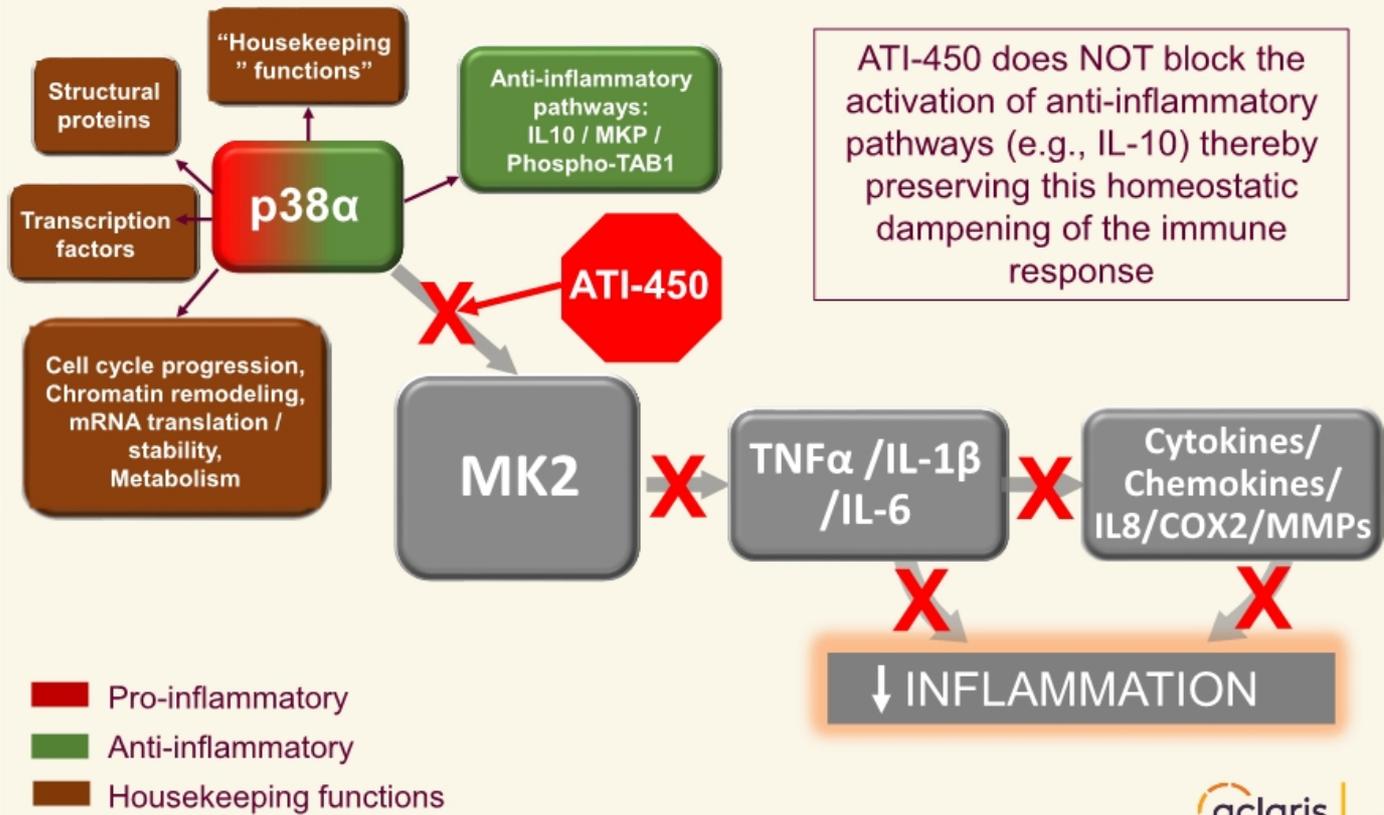

MK2 = mitogen-activated protein kinase-activated protein kinase 2 (MAPKAPK2)

RA = rheumatoid arthritis; IBD = inflammatory bowel disease; SJIA = systemic juvenile idiopathic arthritis

# MK2-driven cytokines are central to many diseases

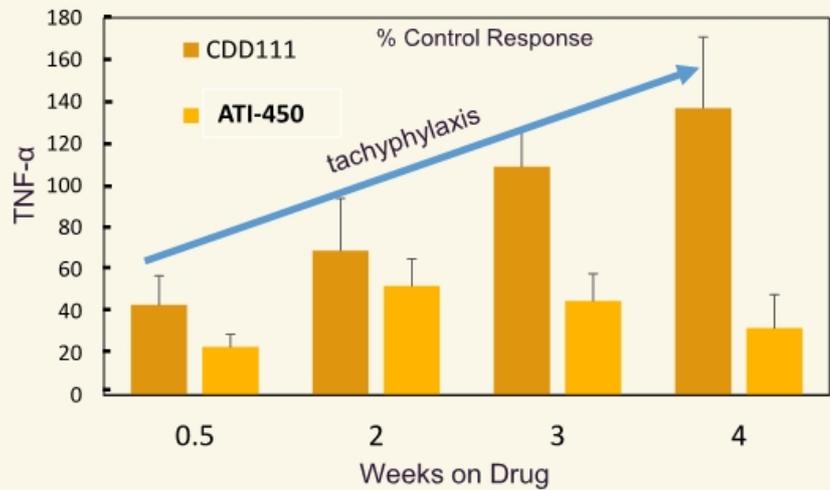

# ATI-450 Inhibits the Expression of Key Inflammatory Cytokines: TNF $\alpha$ , IL-1 $\beta$ and IL-6

## Mouse LPS-Induced TNF $\alpha$ Production

*ATI-450 demonstrated durable response (no tachyphylaxis)*

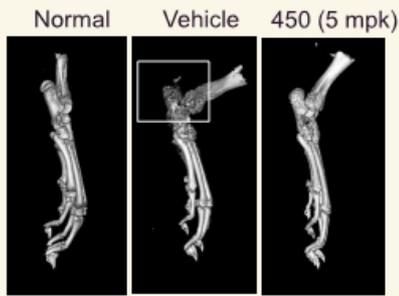

- Global p38 inhibitor CDD-111 lost inhibition over time
- **This investigational MK2 pathway inhibitor ATI-450 demonstrated durable responses in this mouse model (no tachyphylaxis)**

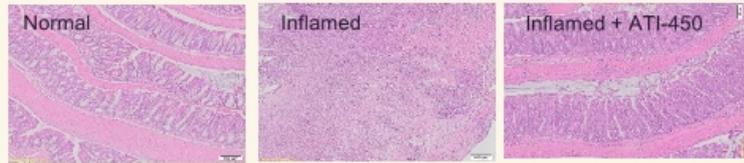

- Conventional p38 (CDD-111) and MK2PI (ATI-450) administered to mice in feed starting day 1 and continuing through day 28
- At the time point indicated, mice were LPS challenged and blood TNF $\alpha$  levels determined

# In vivo Results of MK2 Pathway Inhibitor ATI-450

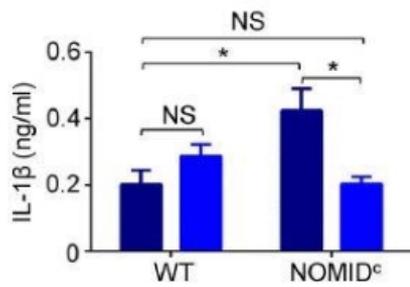

## Joint Protection in Rat Arthritis Model<sup>1</sup>

## Blockade of Gut Inflammatory Infiltrate in Murine Adoptive Transfer Ulcerative Colitis Model<sup>3</sup>

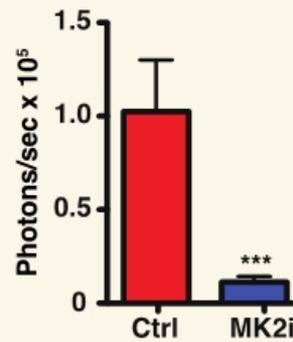

## Cytokine Modulation in Orphan Autoinflammatory Disease (CAPS)<sup>1</sup>

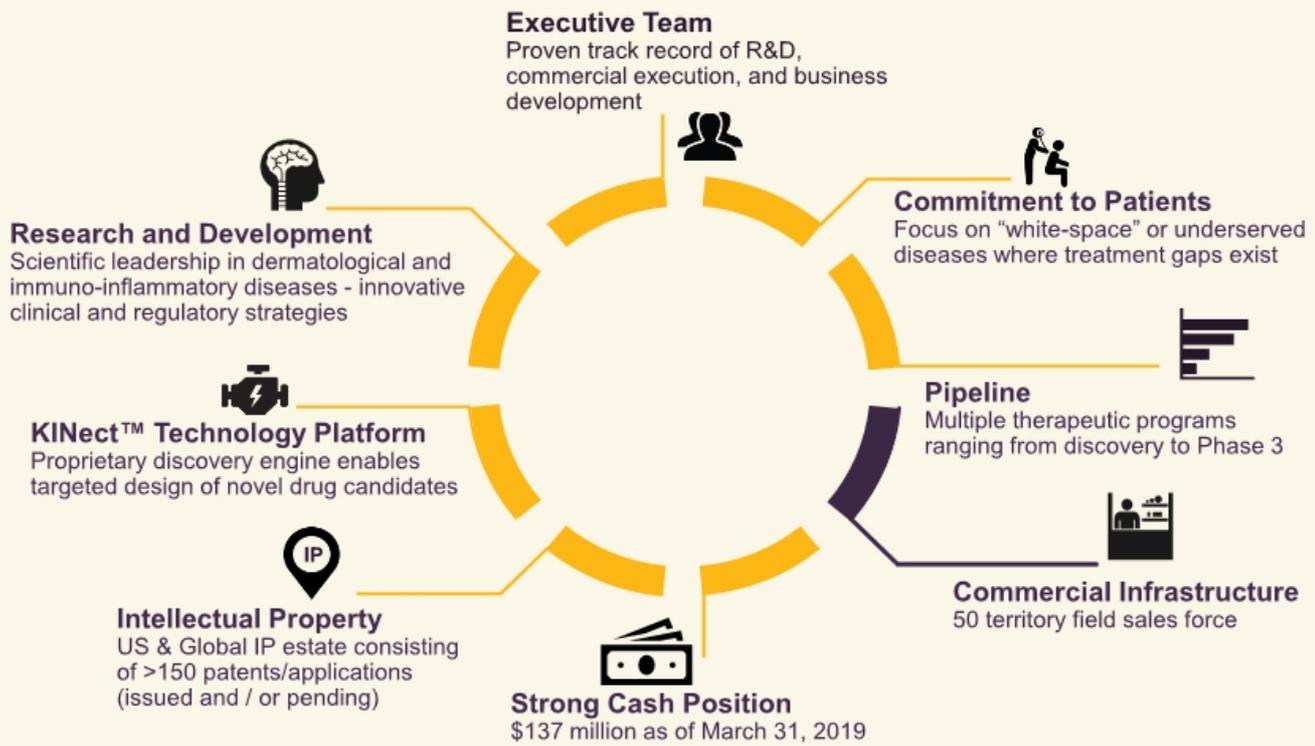

## Reduction in Breast Cancer Bone Metastasis in Mice<sup>2</sup>

### Bone Metastasis

Milestone	2019				2020			
	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4
<b>A-101 45% Common Warts</b>								
Phase 3 Data								
Submit NDA								
<b>ATI-501/ATI-502 (Oral/Topical JAK Inhibitor)</b>								
ATI-501 - Phase 2 AT/AU Dose Range Data								
ATI-501 - AT/AU End of Phase 2 FDA mtg								
ATI-502 - Phase 2 Patchy AA Dose Range Data								
ATI-502 – Initiate Phase 3 Patchy AA Trial <sup>1</sup>								
ATI-502 - Phase 2 Open-label Vitiligo Data <sup>2</sup>								
ATI-502 - Phase 2 Open-label AGA Data <sup>3</sup>								
ATI-502 - Initiate Phase 2 AGA Trial								
ATI-502 - Phase 2 Open-label Atopic Dermatitis Data								
<b>Inflammation / Immunology</b>								
ATI-450 (MK2 Inhibitor) - Initiate Phase 1 Trial								
ATI-450 (MK2 Inhibitor) - Phase 1 Data								
ATI-1777 (Soft JAK) – Submit IND								
ATI-1777 (Soft JAK) - Initiate Phase 1/2 Trials								

<sup>1</sup> If the results from the AA-201 trial are positive, our next steps may include holding an end of Phase 2 meeting with the FDA, and initiating a Phase 3 trial of ATI-502 as a topical treatment for AA in the first half of 2020.

<sup>2</sup> VITI-201: 6-month data interim expected mid-2019; 12-month data expected fourth quarter of 2019

<sup>3</sup> AGA-201: 6-month data expected second quarter of 2019; 12-month data expected fourth quarter of 2019
